Updating OPtimize on an Android device – Clearing Cache and Refreshing

Clearing your cache and refreshing may be necessary to get the latest version of OPtimize.

Clearing the Cache and Storage

1. Launch the app by selecting this link: https://web.kplogic.com
2. Tap on vertical 3 dots icon in the upper right corner for the options menu and select the following:
   - Settings (scrolling down may be necessary).
   - Site Settings
   - Data Stored
   - web.kplogic.com
   - Select Clear & Reset

Refreshing the app:

Method 1:

1. Launch the app by selecting this link: https://web.kplogic.com
2. Pull down on the app (touch and drag down in the middle of the app) until you see the refresh spinner.

Method 2:

1. Launch the app by selecting this link: https://web.kplogic.com
2. Tap on the vertical 3 dots icon for options menu.
3. Tap on reload arrow icon to refresh the website page.
